A white car is shown in motion on a city street, with a blurred background of buildings and trees. The car is positioned on the right side of the frame, moving towards the left. The background features modern buildings and lush green trees, all rendered with a motion blur effect to convey speed. The sky is clear and blue.

# INTERIOR AS YOUR SECOND SELF

ŠKODA Genuine Accessories

## ŠKODA RAPID brings a revolutionary possibility of individualizing the car interior

Do you want to enjoy a memory of your finest trip? Or have those, who are waiting for you at home, always in sight? Or simply style your vehicle to the last detail? Fine-tune the interior of your vehicle with a decorative foil, which fits perfectly into the space on the dashboard in front of the passenger seat. But most importantly, which can carry any motive you can think of. Thus, it perfectly reflects your style, temperament or hobbies. And when they change? You can peel the foil off in one fell swoop, and you can spice up your car again!

### Being a designer is so easy!

#### 1. Capture your best

Take a photo of your motive, or choose any favorite picture. Be creative, imagination has no limits!

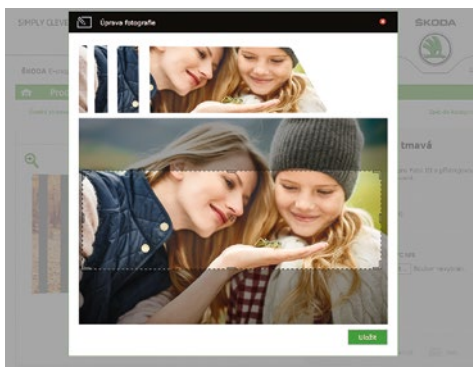

#### 3. Let's stick it on

Stick the delivered foil onto the dashboard according to the attached instructions. If you are unsure of your skills, do not hesitate to contact our service partners, who will be happy to help you.

#### 2. Just a few clicks

Go to the page of ŠKODA E-shop (eshop.skoda-auto.com), where you will find a simple application in the "Interior Foils" section. In a few easy steps, you first choose the type of dashboard decor (black, white or light gray and dark gray brushed), upload your photo, adjust the desired section, and then all you have to do is complete the order. The finished foil will be delivered by courier to your home.

### Don't have your own idea at the moment?

If you want to decorate the interior of your vehicle to your liking but don't have a suitable picture, use the selection of ready themes. The pre-defined interior foils can also be ordered in the ŠKODA E-shop. You just need to decide, which one of the designs available will be the right one for your car.

# INFO TAINMENT

# INFOTAINMENT

Driving the RAPID SPACEBACK will be even more pleasant with ŠKODA Genuine Accessories. No more getting lost in unknown places, boredom during long motorway journeys or stopping for a phone call. You'll be reliably guided through unfamiliar locations by the navigation system. The radio will provide a high quality listening experience of your favourite music. Thanks to hands-free you can get in touch with your family or comfortably deal with urgent work matters.

## CARSTICK

The CarStick can be used to generate an internet connection for mobile online services (ŠKODA Connect). This means that you can use the services without using an internet connection from your smartphone. You can even set up a Wi-Fi hotspot in your vehicle in just a few seconds. Simply insert a suitable SIM card into the CarStick, connect it to the USB slot in front of the gear lever and set up on the Amundsen navigation system. You can then connect any Wi-Fi enabled device to your own on-board network. (000 051 409F)

## UPDATE YOUR MAPS AND SOFTWARE

Our goal is to make your life easier and your trips a pleasure. To achieve this, we prepared a new Infotainment Portal for you, using state-of-the-art technologies. Visit <http://infotainment.skoda-auto.com>, enter your vehicle VIN code and see how easy it is. The system recognises which updates you need and offers you the chance to download them comfortably at home. If you buy a new ŠKODA vehicle or navigation system, you get free map updates of your Europe navigation database for three years.

## MAP UPDATES

Any road network is subject to ongoing changes, which means you must update the memory of your navigation system. This is the only way to travel securely to your destination every time, find the shortest route and enjoy your trip. For this reason, map updates save you time and money.

## COMPATIBILITY LIST

This application will display your external device (smartphone, tablet) compatibility with software functions of the Infotainment system (Bluetooth, SmartLink™ etc.).

## SOFTWARE UPDATES

Don't forget to update other software in your Infotainment system.

## MY DESTINATIONS

Through the MyDestination App you can set up destinations of your upcoming trip comfortably at home. Then you simply import the list to your navigation device. You no longer have to sit in your car while preparing your route. Controlling the navigation device is easier and more comfortable with this application.

## ONE APP AND CONNECT APP

OneApp is a useful mobile application offering easy access to a wide range of services and assistance tools.

You can easily check the vehicle status or a trip log or plan a trip by referencing nearby places of interest simply and conveniently on your smartphone in the comfort of your home.

With ŠKODA Connect App in place, your car remains under your control at all times. Access all necessary features and functions of your vehicle anywhere and anytime from your smartphone or smartwatch.

## Holds and lasts

Did you know that the textile floor mats from ŠKODA Genuine Accessories also undergo the so-called 'heel test'? This test simulates the action of the driver's foot on the accelerator, sinking the heel 5 mm into the floor mat in both dry and wet conditions at an angle of 45°. The floor mats also undergo an additional load test in the form of a long driving test, and further focus is placed on the brackets fixing the front floor mats to the car upholstery. The tests are designed to verify the proper clip strength needed to enable comfortable handling by the driver, while keeping the floor mat in place despite the occasional application of force during the drive.

ŠKODA Genuine Accessories offers engine cover, which protects the engine against water, dust, mud and rocks on the roads. Moreover, the cover reduces engine noise, and increases the life of its components (alternator, starter motor, belts, and other). It improves the car's aerodynamics, thus reducing the fuel consumption. The engine cover is made of plastic of the highest quality, which is characterized by high strength, elasticity and resistance against both mechanical (road gritting, gravel) and chemical (oil, fuel, etc.) damage. Mounting the engine cover does not require any modification to the chassis of the car.

Surely you have many plans with your family where to go, what to see and how to enjoy leisure time. Whether you go on a sports trip, discovery holiday or just a weekend at the cottage, even the large luggage compartment may not be sufficient. ŠKODA Genuine Accessories offer a simple solution in the form of products enabling you to transport sports equipment and other luggage outside the car's interior.

Heel test device

The racks undergo a number of demanding tests. Their resistance to corrosion, loading capacity, strength and durability are tested in various conditions, as well as the subsequent water tightness of the car after their installation. During the so called City Crash test, a rack loaded with 90 kg must remain on the car body under a force of approximately 12G lasting for 50 milliseconds (impact simulation).
